Reverse Two-Point Turnabout Step by Step

1. Signal to the right and drive towards the turnabout space with the car's right tires close to the white line marking the edge of the road.

2. Stop when you can just see the front right cone in your right rear passenger window.

3. Turn the wheel all the way to the right. Check your rear view mirror for “traffic”, and also check the left blind spot (looking over your shoulder) because your car is about to swing out into traffic. Then begin slowly backing into the space.

4. Stop when the car is straight. Then turn the wheel 1 1/2 turns to straighten the wheels.

5. Back straight into the space until the front of the car clears the front cones; then stop.

6. Signal to the right, check both ways for traffic and pedestrians, then turn right to exit.
